## NOTES REGARDING SERVICES OF THIS UNIT AND FEATURES OF SYSTEM

- Be sure to refer to the instruction manual of UD-7 of this system for the operation.
- This unit is the receiver that is mounted with tuner and amplifier. However, as INPUT SELECTOR IC is incorporated into the graphic equalizer (GE-711), signal system goes through the graphic equalizer. Therefore, radio waves cannot be received with this unit alone.  
When you listen to radio waves with this unit alone, connection must be made by the following method:  
a) Facilitated connection method, or b) Regular connection method.  
Instead of tuner output, AG output can also be connected to X09 side.
- Facilitated connection method (It can be connected at once after case is opened)  
Connect the output pin TP7(Lch) and TP9(Rch) of the tuner board (X05, A/6) with the test pin TP1(Lch) and TP3(Rch) of main board (X09) (B/5). <Fig. 1> (Output decreases partly because of the relation with input impedance)
- Regular connection method (Refer to disassembling method for repair)  
Connect the output pin TP7(Lch) and TP9(Rch) of the tuner

- board (X05, A/6) which stands against the rear wall with lead wire (for input) of R1(Lch) and R2(Rch) of main board (X09) (A/5) which is installed below the tuner board. With this operation, action of the surround circuit which cannot be checked with procedures of a) for output can be checked. <Fig. 2> (Be sure to connect the GND of tuner board (X05, A/6) for activating the microprocessor normally with GND of chassis this time)
- The small radiator cover is attached to this unit. Use it to check power transistors and so on by removing it. In addition, the main board can be checked by removing the bottom board after detaching the case from the unit. (For further detail, refer to the disassembly method for repair)
  - As a new function, one method of graphic equalizer has become able to be selected and stored into memory at each INPUT SELECTOR. The memory can be conducted by GE microprocessor. The REC level set by CRLS at each INPUT SELECTOR (excluding TAPE) can also be stored into memory. The memory can be conducted by DECK microprocessor.

## NOTES REGARDING SERVICES OF THIS UNIT AND FEATURES OF SYSTEM

- AI TIMER1, timer for wake-up, increases its volume every 30 seconds at three stages. Although its main microprocessor is the GE microprocessor, it functions in connection with the tuner and amplifier of unit. (This time, AI LOUDNESS of GE is not subject to operation)
  - AI TIMER2, timer for wake-up, plays back the first and second track of CD, then receives the radio broadcasting automatically.
- The A1 sensor for remote-control light receptor, of X05 uses initially W02-1049-05 and uses W02-1048-05 thereafter. They can be installed on printed board even though their shapes and the location of terminals are different from each other.

- LED for VOLUME (Part number: B30-1284-08)  
It is basically the LED for volume, which serves as one part of master VOL ass'y (R29-5042-05). However, the LED can be easily removed with tweezers after removing the volume thumbscrew when LED malfunctions.

- Exchange the fuse resistance mounted on the printed board of power-source transformer for a new one after removing the transformer and putting it on the side of the set.

## PACKING

&lt;Fig. 1&gt;

&lt;Fig. 2&gt;

## System connections

Make connection as shown below. When connecting the related system components, refer also to the instruction manuals of the related components.

When connecting the parallel cord, be sure to match the colors of the sockets.

Do not plug in the power lead until all connections are completed.

## ■ Connection of parallel cord

- Hold the connector of the parallel cord in parallel with the socket on the rear panel, and insert securely until it clicks.
- Connect the parallel cord by matching the colors of the connector and socket.
- When unplugging the parallel cord, push and hold the two ends of the connector and pull the connector straight from the rear panel socket.

Notes:

- Connect all cords firmly. If connections are loose there could be loss of sound or noise produced.
- When plugging and unplugging connection cords without removal of the power cord can cause malfunctions or damage to the unit.

## Controls and indicators

### ■ Receiver

## Operation of remote control unit

Model: RC-711  
Infrared system

## ■ Loading batteries

## 1 Remove the cover.

## 2 Insert batteries.

Insert two AA-size (R6/  
SUM-3) batteries as indicated  
by the polarity marking.

## 3 Close the cover.

## ■ Operation procedure

Plug the power cord of the system into an AC wall outlet, and press the POWER key on the remote control unit to turn the power on.  
When the power is turned on, press the key of the source component to be operated.

- When two operation keys on the remote control unit are pressed successively, press each key securely reserving an interval of more than 1 second for each press.

## Notes:

1. The supplied batteries are intended for use in operation checks. Therefore, their lives may be shorter than ordinary batteries.
2. When the remote-controllable distance gets shorter than before, replace both batteries with new ones.
3. Malfunction may occur if direct sunlight or the light of a high-frequency lighting fluorescent lamp enters the remote control light sensor. In such a case, change the system installation position to prevent the malfunction.

## DISASSEMBLY FOR REPAIR

## How to remove the chassis of bottom board

1. Detach the radiator cover by removing the three screws (1) from the cover of rear side. (It is used for check and so on of power transistor)
2. Remove seven screws (2) of chassis of added bottom board.
3. Remove four screws (3) of the transformer.
4. Remove the chassis of bottom board from the right side of front panel by paying attention not to hook it with surround terminals. (4)

## CIRCUIT DESCRIPTION

## Function of components

Tuner unit (X05-3992-71)

Ref. No.	Components	Use/Function	Operation/Condition
IC1	LA1285	FM/AM system IC	FM IF amplification, FM detection, AM MIX, AM IF amplification and AM detection.
IC2	AN7470	Audio demodulation (AM, FM)	FM stereo multiplex
IC3	LM7001	PLL IC	PLL
IC5	CX50112-1270	Tuner microprocessor	Tuner control, timer operation and control of others.
IC6	$\mu$ PD7538ACU-232	Amplifier microprocessor	Amplifier control.
IC7	PST529D	Reset IC	Generates the reset power source.
IC9	$\mu$ PC7805HF or AN7805F	+5V 3-terminal regulator	+5V rectification
IC10	$\mu$ PC7805HF or AN7805F	+5V 3-terminal regulator	+5V rectification
Q1	25C1923(R,Q)	IF amplification	IF amplification of FM
Q2	25K183(L,M)	PLL time constant conversion SW	At the time of LW reception: OFF
Q3	25C945(A)(Q,P) or 25C1740S(Q,R)	L.P.F.	L.P.F. for PLL (integration type)
Q4	25C1845(F,E)	L.P.F.	L.P.F. for PLL (integration type)
Q5	25C945(A)(Q,P) or 25C1740S(Q,R)	MW/LW conversion	At the time of MW: ON
Q6	25C945(A)(Q,P) or 25C1740S(Q,R)	MW/LW conversion	At the time of LW: ON
Q7	25C945(A)(Q,P) or 25C1740S(Q,R)	Buffer	Buffer for FM detecting output (for L.P.F. matching)
Q8	25A733(A)(Q,P) or 25A933S(Q,R)	FM + B conversion	At the time of receiving FM: ON
Q9	25A733(A)(Q,P) or 25A933S(Q,R)	LW + B conversion	At the time of receiving LW: ON
Q10	25A733(A)(Q,P) or 25A933S(Q,R)	MW + B conversion	At the time of receiving MW: ON
Q11	25C945(A)(Q,P) or 25C1740S(Q,R)	Deemphasis conversion	$\left( 50 \mu\text{sec.} \leftrightarrow 75 \mu\text{sec.} \right)$ At the time of T: ON: 75 $\mu\text{sec.}$
Q12	25C945(A)(Q,P) or 25C1740S(Q,R)	Deemphasis conversion	
Q13	25C945(A)(Q,P) or 25A1740S(Q,R)	Reversing circuit	Controls reset circuit (Tuner $\mu$ -COM)
Q14	25A733(A)(Q,P) or 25A933S(Q,R)	Reversing circuit	Controls reset circuit (Amplifier $\mu$ -COM)
Q15	25A733(A)(Q,P) or 25A933S(Q,R)	Reversing circuit	Reverses the mute signal from the amplifier microprocessor.
Q16	25A733(A)(Q,P) or 25A933S(Q,R)	Reversing circuit	Reverses the mute signal from the tuner microprocessor.
Q17	25A733(A)(Q,P) or 25A933S(Q,R)	Destination Conversion SW	Converts deemphasis and channel space.
Q18	25D1302(S,T)	Mute	Mute SW of Lch.
Q19	25D1302(S,T)	Mute	Mute SW of Rch.
Q21	25D1286(Q,P)	+14V rectification	Generates the stabilized power source for 14V.
Q22	25C945(A)(Q,P) or 25C1740S(Q,R)		
Q23	25C945(A)(Q,P) or 25C1740S(Q,R)		

## CIRCUIT DESCRIPTION

## Function of components

Audio unit (X09-3142-71)

Ref No.	Components	Use/Function	Operation/Condition
IC1	NJM2068D	Sumound	Sumound buffer
IC2	NJM2068D	Headphone amplifier, Super woofer buffer, VR detecting comparator	IC2 (114) (214) headphone amplifier, IC2 (3/4) super-woofer buffer, IC2 (4/4) comparator
IC3	TC9215P	Sumound selector	Sumound is turned ON/OFF with the pin No. 23 of IC6 <X05>. H: ON, L: OFF
		Mute	MUTE is turned ON/OFF with the pin No. 13 of IC6 <X05>. H: ON, L: OFF
IC4	μPC1237HA	Protection	
IC5	TA8409S	Main volume drive	MAIN VOL is turned DOWN/UP with the pin Nos. 6 and 7 of IC6 <X05>.
IC6	TA8409S	N.B.C. volume drive	N.B.C. VOL is turned DOWN/UP with the pin Nos. 10 and 11 of IC6 <X05>.
IC7	μPC7918HF	-15V stabilizing power source	3-terminal regulator
Q1-4	2SA92IF.EI	For the 1st stage A class	
O5, 6	2SA92IF.EI	For the 2nd stage A class	
Q7-10	2SC1845IF.EI	For the 2nd stage A class	
Q11,12	2SC1137F18W.WI	For temperature compensation	
Q13,14	2SC2268T*5	Final Tr.	
Q15,16	2SB1493BT*5	Final Tr.	
Q17,18	2SC2631(R.SI)	For detecting overloading	
Q81	2SC2678(BI)	For super woofer muting	It is turned ON by turning on Q52.
Q52	2SA733(AI/QI) or 2SA833(SI/QI)	Super woofer muting drive	It is turned ON by lowering pin No. 9 of IC6 (X05).
Q53	2SA733(AI/QI) or 2SA833(SI/QI)	Ripple filter	
Q54	2SA92IF.EI	For protection	
Q55	2SC3666	AC relay drive	It drive AC relay K1, 2 with the pin No.14 of IC6 (X05).
Q56	2SC1740(SI/QI) or 2SC345(AI/QI)	Speaker relay drive	It drives the SP relay K3 with the pin No.16 of IC6 (X05).
Q57	2SD1266(QI,P)	+15V stabilizing, power source	
D1,2	HSS104 or 1SS133	For A class	
D3,4	HSS104A or 1SS131	For protection	
D11	RBV-602LFA	For rectification	
D12	HZS155(BI) or RD15JS(B)	+15V stabilizing, power source	
D13	HZS155(BI) or RD15JS(B)	For +15V stabilizing power source A class	
D14,15	HZSS 1N(B2) or RD5 15S(B2)	For VR detection	
D16	HZS4.7N(BI) or RD4.7S(BI)	For muting	
D17-22, 34,35	HSS104 or 1SS133	For protection of static electricity	
D23	HSS104 or 1SS133	For removing headphone shock noise	
D24	HSS104 or 1SS133	For removing selector shock noise	
D25,26	HSS104 or 1SS133	For relay	
D27	HSS104A or 1SS131	For relay	
D28	HSS104A or 1SS131	For detecting protection AC	
D29	S5566B	For rectifying AC relay power source	
D32	HSS104 or 1SS133	For mute	
D33	HSS104 or 1SS133	For VR LED	
D34 or 35	HSS104 or 1SS133	For protection of static electricity	

## CIRCUIT DESCRIPTION

## Microprocessor and back-up condenser of this unit

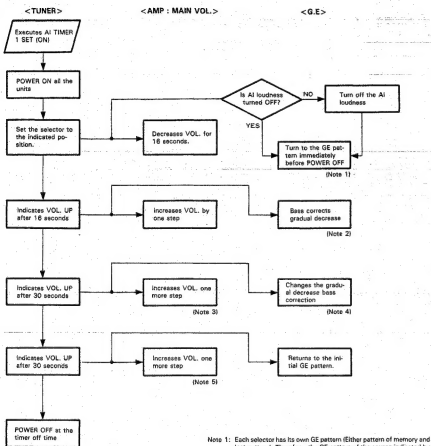

## Initialization (reset) of each microprocessor and test mode

	A-711/711L	GE-711	X-711	DP-711
	TUNER microprocessor IC5 (X05)	AMP. microprocessor IC6 (X05)	DECK microprocessor IC1 (X2B)	CD microprocessor IC4 (X32)
Back-up Condenser	(X05) C90 0.047F 5.5V	None	(X11) C136 0.047F 6V	None
Initialization (Reset)	Insert the AC plug to the outlet while pressing the "ENTER" key.	Pull out the AC plug from the outlet and then insert again.	Turn on AC while pressing the "ENTER" and "MEMO" keys of GE.	Keep pressing the "ENTER" key for more than three seconds per selector turns out to be -15 dB.
Operation	While simultaneously pressing the selector "CD" and tuning "DOWN" keys, insert AC plug into the outlet and simultaneously touch off the keys.	(1) Turn on AC while pressing the "FLAT" key. (2) There is also the selector test mode.	For details, see the service manual of X-711.	There is the adjustment test mode. For details, see the service manual of DP-711.
Release	Press either one of ten keys, "BAND" or "UP/DOWN" keys.	Turn AC on and off without pressing any key.		
Contents	(1) Turns on all the FL tubes. For details, see the service manuals of various equipment.		No FL tube.	

## CIRCUIT DESCRIPTION

## ② Indication flow of AI TIMER 1

Note 1: Each selector has its own GE pattern (Either pattern of memory and last pattern). Therefore, the GE pattern of the source indicated by the timer appears.  
 Note 2: Shifts to the pattern which has the loudness effect (There are two patterns of the gradual decrease bass correction of AI TIMER 1).  
 Note 3: The three steps of increases volume can be selected.  
 Note 4: Decrease correction volume is lowered in accordance with VR UP.  
 Note 5: Same as Note 3. However, the VR position is limited at the position of 12.

## CIRCUIT DESCRIPTION

## Function description

## a) AI TIMER 1

- With the program timer mode set to PLAY, when the timer is turned ON, the setting contents for the AI TIMER 1 is activated if the AI TIMER 1 is set to ON (the FL indicator is lit).
- When the AI TIMER 1 is turned ON, first playback starts with the minimum volume level, then the volume level is increased in three steps.
- The third-step volume level (the maximum volume level) can be selected among the three types of the volume levels (VOL. 1-3). Each time the AI TIMER 1 key is pressed, the maximum volume level is changed in order from VOL. 1 to VOL. 3 and TIMER OFF setting cyclically.

## ① When the key is pressed with the AI TIMER

1 is OFF (FL indicator is lit):

OFF → VOL. 1 → VOL. 2 → VOL. 3

## ② When the key is pressed in the volume setting mode (FL indicator is lit):

Example: When VOL. 2 is selected

VOL. 2 → VOL. 3 → OFF → VOL. 1

## Reference for volume selection

- The VOLUME control resets as the volume changes.
- The graphic equalizer curve also varies accordingly.

## b) AI TIMER 2

- With the program timer mode set to PLAY, when the timer is turned ON, the setting contents for the AI TIMER 2 is activated if the AI TIMER 2 is set to ON (FL indicator is lit).
- When the AI TIMER 2 is turned ON, if the disc is loaded in the CD player, the two tracks on the disc is played regardless whether the other source is set for play. Then, the playback source is changed to tuner automatically.
- Each time the AI TIMER 2 key is pressed, the timer setting is changed alternately.

## Timer program operation

## &lt;When the program settings are registered within the same period&gt;

- When the two or more program settings are to be started at the same time:  
The program having the least number is activated and others will be cancelled.
- When the setting time for two or more programs differ:  
First, the program with the earliest setting time is activated. Then, if the same mode (REC mode or PLAY mode) has been designated for the other program, the operation is changed to the program in which the same mode as the first one is designated and the end time for the above program will be cancelled. If another mode is set for of other programs, the contents will be cancelled.

Example 1: When the operation modes for all three programs are set to PLAY:

Example 2: When the operation modes for programs ②, ③ are set to PLAY and that for the program ① is set to REC:

Example 3: When the operation mode for programs ①, ② are set to REC and that for program ③ is set to PLAY:

The program end is determined by the OFF time of the program which is activated at the last.

## CIRCUIT DESCRIPTION

### N.B. CIRCUIT (X09-3142-71 (B/5))

The N.B. of N.B. CIRCUIT stands for Natural Bass, and it is the circuit to create further natural bass sound.

It is roughly composed of ① Variable loudness control and ② Main amplifier bass emphasizing circuit showed in the chart. The ① Variable loudness control in the chart has become able to vary the level of loudness control by mounting the traditional loudness control variable VR (VR2, (1/4)) onto itself.

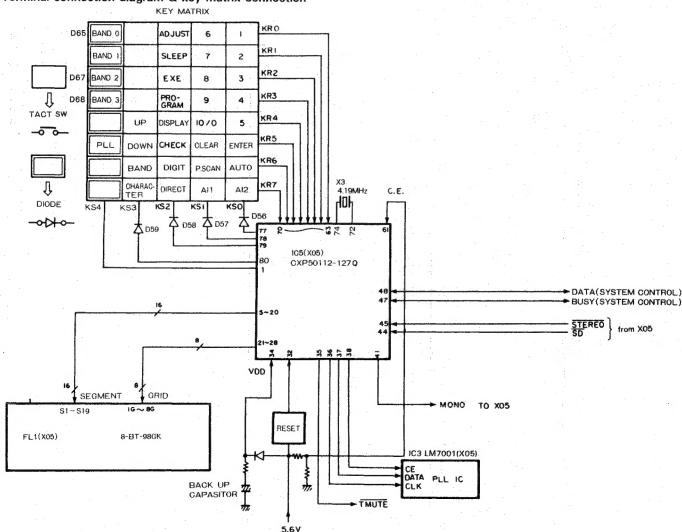

The ② main amplifier bass emphasizing circuit can boost up the desired frequency with the fixed number of C.R. parts for input and returning C.R. parts of main amplifier. It has also become able to vary these boost levels by mounting VR2, (3/4) onto it. The fixed number of this A-711/711L has been set so as to boost up 60 Hz.

The action of this circuit results from the combination of aforementioned ① and ②, which also can vary the boost level of bass sound at the same time.

### IC5: CXP50112-127Q (X05-3992-71) TUNER microprocessor

#### Terminal connection diagram & key matrix connection

## CIRCUIT DESCRIPTION

## Test mode

## (1) Setting method

Insert the AC plug into an outlet and remove your fingers from DOWN key at the same time while pressing DOWN key.

## (2) Contents

## POWER ON

All the FLs turned on

Test Frequency Setting (Table 1)

## (3) Clearing method

All the turned on FLs can be cleared with ten keys, BAND key, UP/DOWN key or POWER key.

## Setting of initial conditions (reset)

## (1) Method

While pressing ENTER key, turn the AC ON.

## (2) Contents

Clears all the memory and returns to the initial conditions. However, the test frequency is newly memorized in the preset memory at this time. (The same as when the back-up data is NG.)

Destination		J	K,P,Y,M,X	T,E
Band	FL			
FM (FM1)	1	76.0 MHz	87.5 MHz	87.5 MHz
	2	78.0 MHz	89.1 MHz	89.1 MHz
	3	80.0 MHz	90.0 MHz	90.0 MHz
	4	82.0 MHz	92.0 MHz	92.0 MHz
	5	83.0 MHz	94.0 MHz	94.0 MHz
	6	83.5 MHz	98.0 MHz	98.0 MHz
	7	86.0 MHz	100.1 MHz	100.1 MHz
	8	88.0 MHz	102.0 MHz	102.0 MHz
	9	89.1 MHz	106.0 MHz	106.0 MHz
	10	90.0 MHz	108.0 MHz	108.0 MHz
AM	1	531 kHz	530 kHz	531 kHz

IC6:  $\mu$ PD7538ACU-232 (X05-3992-71)  
AMP. microprocessor

## Terminal connection diagram &amp; key matrix connection

## CIRCUIT DESCRIPTION

## Pin functions

Pin No.	Pin name	I/O	Symbol	Description
1	RESET	I	RESET	Reset input (H: Reset)
2	CL1	—	—	System clock terminal
3	CL2	—	—	System clock terminal
4	V <sub>PH</sub>	—	—	No use. (GND)
5	V <sub>DD</sub>	—	—	No use. (GND)
6	P53	O	VOL DOWN	Motor volume down drive
7	P52	O	VOL UP	Motor volume up drive
8	P51	O	VOL LED	Volume indicator LED drive
9	P50	O	S.WOOFER	Super woofer mute (H: ON, L: OFF)
10	P23	O	BASS UP	N.B. circuit volume up drive
11	P22	O	BASS DOWN	N.B. circuit volume down drive
12	P21	—	—	No use. (OPEN)
13	P103	O	MUTE	Mute (H: ON, L: OFF)
14	P102	O	POWER	Power relay drive
15	P101	—	—	No use. (GND)
16	P100	O	SP ON/OFF	Speaker ON/OFF conversion (H: ON, L: OFF)
17	P113	I	VOLUME IN	Volume position detection input
18	P112	I	REMOCON IN	Remote control input
19	P111	I/O	DATA	Serial data input/output
20	P110	I/O	BUSY	Serial busy input/output
21	V <sub>DD</sub>	—	—	Power supply pin
22	P93	O	S.WOOFER	Super woofer LED drive
23	P92	O	SURROUND	Surround ON/OFF and LED drive (H: ON, L: OFF)
24	P91	—	—	No use. (OPEN)
25	P90	O	TAPE	TAPE LED drive
26	P83	O	DAT/LED	DAT/LED drive
27	P82	O	TUNER	TUNER LED drive
28	P81	O	CD	CD LED drive
29	P80	—	—	No use. (OPEN)
30	P43	I	SP OFF	Speaker OFF detection input (Turn SP OFF when "L" signal is input)
31	P42	—	—	No use. (GND)
32	P41	—	—	No use. (GND)
33	P40	—	—	No use. (GND)
34	P33	—	—	No use. (OPEN)
35	P32	—	—	No use. (OPEN)
36	P31	O	KS1	Key scan output signal 1
37	P30	O	KS0	Key scan output signal 0
38	P03-S	I	KR3	Key return input signal 3
39	P02-S	I	KR2	Key return input signal 2
40	P01-S	I	KR1	Key return input signal 1
41	P00-INTO	I	KR0	Key return input signal 0
42	V <sub>SS</sub>	—	—	GND pin

## CIRCUIT DESCRIPTION

## Timing chart

## (1) POWER KEY ON

## (2) SELECTOR, SURROUND, SUPER WOOFER KEY ON

\* When the switching of POWER ON/OFF or selector is executed in the condition of SUPER WOOFER ON, S. WOOFER MUTE will have the same timing as MUTE (The logic is reversed).

## Test mode

## a) Setting method

While pressing the "CD" key and tuning "DOWN" key, insert the AC plug into the outlet and simultaneously touch off the key, then the amplifier and tuner simultaneously enter the TEST MODE. When you wish to enter only the amplifier into the TEST MODE, pull out the AC plug from the outlet in the POWER ON condition and insert the AC plug into the outlet while pressing the "CD" key.

## b) Clearing method

In order to simultaneously clear the amplifier and tuner, press either the ten keys, "BAND" key or "UP/DOWN" key. In order to clear the amplifier, press either "TUNER" key or pull out the AC from the outlet. In order to clear the tuner, refer to the tuner microprocessor (page. 22).

## c) Contents of operation

- POWER is turned ON and all the LEDs are lit on.
- By pressing "S-WOOFER", both the VOLUME and N.B. CIRCUIT are simultaneously up, and remain to be up for 12 seconds. Then, they go DOWN and STOPS after about 12 seconds.
- Even if the "CD", "TAPE", "DAT/LED", "SURROUND" and "POWER" keys are pressed, they are not accepted.

## Initial status

Item	Condition
INPUT	TUNER
SURROUND	OFF
SUPER WOOFER	OFF
POWER	OFF (STAND BY)
MUTE	ON
MOTOR VOLUME CONTROL	OFF
LED	OUT LIGHTS

Initialization: Pull the AC plug from the outlet and then insert again.

## CIRCUIT DESCRIPTION

IC5, 6: TA8409S (X09-3142-71)  
Volume motor drive IC

Block diagram

Truth table

INPUT		OUTPUT		MODE
①	②	③	④	Pin No. of IC5, 6
IN 1	IN 2	OUT 1	OUT 2	Motor mode
0	0	no	no	STOP
0	1	L	H	CW
1	0	H	L	CCW
1	1	L	L	BRAKE

no: High impedance  
Input "H" active

## ADJUSTMENT

## Tuner unit

If alignment point is "X", confirm the value.  
If not, continue the final push and (RECEIVE) PLL.

No.	ITEM	INPUT SETTINGS	OUTPUT SETTINGS	TEST SETTINGS	ALIGNMENT POINTS	ALIGN POINT	FIG.
FM SECTION							
1	BIAS (VCE)	—	Connect a DC voltmeter between TP18(VT) and TP13(CB2)	87.5MHz	—	1.5V	(a)

## Connection

## 28

- Adjustment method** (Use a high-impedance buffer to avoid frequency deviation.)  
Connect a high-accuracy frequency counter to pin 74 by way of the FET probe shown above, and adjust the frequency fully up to the first digit of the X3 reference frequency 4,194,304 Hz. (Connect the negative (–) side of the frequency counter to the GND side of C99.)

Note (b) Perform the trimmer adjustment after energization of around 10 minutes at normal temperature.

- (3) Monthly error calculation method  
For example, when the result of measurement at pin 74 by the frequency counter is  $f_x = 4,194,275 \text{ Hz}$ ...  
(Reference frequency  $f_0 = 4,194,304 \text{ [Hz]}$ )

$$\text{Monthly error [sec]} = \frac{f_x - f_0}{f_0} \times \text{the number of seconds}$$

$$\begin{aligned} &= \frac{4,194,275 - 4,194,304}{4,194,304} \\ &\quad \times (60 \times 60 \times 24 \times 30) \\ &= -17.9 \text{ [sec]} \end{aligned}$$

\* A minus value as the monthly error means a loss.

Capacitance value of additional trimmer	C8 constant modification

[illegible]

DC voltages are as measured with a high-impedance voltmeter during reception of the FM broadcast signal (with a signal strength of 60 dB at the ANT terminal). Values may vary slightly due to variations between individual instruments or/and units. Values in parentheses are as measured during reception of the AM broadcast signal (with a signal strength of 60 dB at the ANT terminal).

DC voltages are as measured with a high impedance voltmeter. Values may vary slightly due to variations between individual instruments or/and units.

**CAUTION:** For continued safety, replace safety critical components only with manufacturer's recommended parts (refer to parts list). **!** Indicates safety critical components. To reduce the risk of electric shock, leakage current or resistance measurements shall be carried out (exposed parts are acceptably insulated from the supply circuit) before the appliance is returned to the customer.

## SPECIFICATIONS

### Receiver unit (A-711/L)

#### Amplifier section

##### Rated power output

35 watts per channel minimum RMS, both channels driven,  
at 6  $\Omega$  from 40 Hz to 20,000 Hz with no more than 0.09%  
total harmonic distortion (FTC)

(IEC/NF) From 63 to 12,500 Hz, 0.7% T.H.D.	
at 6 $\Omega$	40 W + 40 W
(DIN) 1 kHz, at 6 $\Omega$	43 W + 43 W
(IHF'66) From 40 to 20 kHz, 0.09% T.H.D.	
at 6 $\Omega$	39 W + 39 W
(EIAJ) Maximum useful power output	
at 6 $\Omega$	50 W + 50 W
Total harmonic distortion	0.09% at rated power 0.04% at 1 kHz, 1/2 rated power

#### Frequency response

CD, TUNER, AUX, TAPE..... 40 Hz ~ 70 kHz, +1.5 dB, -3 dB  
Signal to noise ratio (IHF'66)

DAT INPUT..... 85 dB

Input sensitivity/Impedance

DAT INPUT..... 150 mV/47 k $\Omega$

N.B. circuit (1-30 dB VOLUME level)..... +20 dB (at 60 Hz)

Output level/Impedance

SUB WOOFER OUT..... 1.0 V/3.6 k $\Omega$

Power consumption..... 200 W (IEC)

1.5 A (for U.S.A. and Canada)

Dimensions..... W: 270 mm (10-5/8")

H: 120 mm (4-3/4")

D: 292 mm (11-1/2")

Weight (Net)..... 5.4 kg (11.88 lb)

#### A-711L FM tuner section

Tuning frequency range..... 87.5 MHz ~ 108 MHz

Usable sensitivity (DIN at 75  $\Omega$ )

MONO..... 0.8  $\mu$ V

STEREO..... 29  $\mu$ V

Total harmonic distortion (DIN at 1 kHz)

MONO..... 0.2% (65.2 dBf input)

STEREO..... 0.3% (65.2 dBf input)

Signal to noise ratio (DIN weighted at 1 kHz)

MONO..... 68 dB (65.2 dBf input)

STEREO..... 63 dB (65.2 dBf input)

#### Note:

KENWOOD follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.

Kenwood follows a policy of continuous advancements in development. For this reason specifications may be changed without notice.

Kenwood poursuit une politique de progrès constants en ce qui concerne le développement. Pour cette raison, les spécifications sont sujettes à modifications sans préavis.

Kenwood strebt ständige Verbesserungen in der Entwicklung an. Daher bleiben Änderungen der technischen Daten jederzeit vorbehalten.

#### Stereo separation (DIN)

1 kHz..... 40 dB

Frequency response..... 30 Hz ~ 15 kHz, +0.5 dB, -3.5 dB

#### MW tuner section

Tuning frequency range..... 531 kHz ~ 1,602 kHz

Usable sensitivity..... 14  $\mu$ V/(500  $\mu$ V/m)

Signal to noise ratio

(at 30% mod. 1 mV input)..... 50 dB

#### LW tuner section

Tuning frequency range..... 153 kHz ~ 281 kHz

Usable sensitivity..... 25  $\mu$ V/(1000  $\mu$ V/m)

Signal to noise ratio

(at 30% mod. 1 mV input)..... 47 dB

#### A-711 FM tuner section

Tuning frequency range..... 87.5 MHz ~ 108 MHz

Usable sensitivity (MONO at 75  $\Omega$ )..... 0.95  $\mu$ V/10.8 dBf

Total harmonic distortion (at 1 kHz)

MONO..... 0.2% (65 dBf input)

STEREO..... 0.3% (65 dBf input)

Signal to noise ratio (at 1 kHz)

MONO..... 76 dB (65 dBf input)

STEREO..... 70 dB (65 dBf input)

Stereo separation 1 kHz..... 45 dB

Frequency response..... 30 Hz ~ 15 kHz, +0.5 dB, -3.5 dB

#### AM tuner section

##### Tuning frequency range

9 kHz step..... 531 kHz ~ 1,602 kHz

10 kHz step..... 530 kHz ~ 1,610 kHz

Usable sensitivity..... 14  $\mu$ V/(500  $\mu$ V/m)

Signal to noise ratio

(at 30% mod. 1 mV input)..... 50 dB

## KENWOOD CORPORATION

Shinogi Shibuya Building, 17-5, 2-chome Shibuya, Shibuya-ku, Tokyo 150, Japan

#### KENWOOD U.S.A. CORPORATION

2201 East Dominguez Street, Long Beach, CA 90810;

550 Clark Drive, Mount Olive, NJ 07828, U.S.A.

#### KENWOOD ELECTRONICS CANADA INC.

P.O. BOX 1075, 959 Gains Court, Mississauga, Ontario, Canada L4T 4C2

#### TRIO-KENWOOD U.K. LTD.

KENWOOD House, Dwight Road, Watford, Herts, WD1 6B United Kingdom

#### KENWOOD ELECTRONICS BENELUX N.V.

Machelsesteenweg 418 D-1300 Zaventem, Belgium

#### KENWOOD ELECTRONICS DEUTSCHLAND GMBH

Reinbrücker Str. 15, 60556 Hausenstamm, West Germany

#### TRIO-KENWOOD FRANCE S.A.

13 Boulevard Ney, 75018 Paris, France

#### KENWOOD LINEAR S.p.A.

20125, MILANO-VIA ARBE, 56, ITALY

#### KENWOOD ELECTRONICS AUSTRALIA PTY, LTD. (INCORPORATED IN NSW)

4E Woodcock Place, Laro Cove, N.S.W. 2066, Australia

#### KENWOOD & LEE ELECTRONICS, LTD.

Wang Kue Building, 4th Floor, 34-37, Connaught Road, Central, Hong Kong
